SUMMARY

I take products from idea to a reliable launch. For 8+ years I have worked across project management, quality assurance and, more recently, hands-on building with AI tools. In small teams that means one person who clarifies requirements, builds the first working version, tests it properly and catches what would otherwise break in production. ISTQB certified. Four live products shipped solo, from lead capture sites to an AI-assisted platform with auth, row-level security and multilingual content. Looking for a startup or product team where one person who covers product, build and quality is an advantage.

WHAT I BRING TO A TEAM

- **Product thinking:** I turn vague business needs into clear requirements, user flows and priorities, and I reduce ambiguity before sprint planning.
- **Quality ownership:** E2E, functional, regression, exploratory and UAT testing across desktop and mobile, with a full defect lifecycle in Jira. I find risks early and report them so developers can act fast.
- **Builder mindset:** I prototype and ship working apps with Lovable, React, TypeScript, Tailwind and Supabase, so ideas become testable in hours, not weeks.
- **Security and compliance awareness:** Row-level security, role-based access, reCAPTCHA v3, GDPR consent flows, accessibility (WCAG) and Cyber Hygiene training.
- **Client and stakeholder communication:** Worked directly with B2B clients in the USA, New Zealand, UK, Spain and Latvia; fluent professional English.

SELECTED PRODUCTS (BUILT AND TESTED END TO END)

Tananger Dyreklinikk tanangerdyreklinikk.no

- Bilingual (NO/EN) veterinary clinic website in Norway with online appointment booking, a full services catalogue, a blog and local business SEO.

Bilingual NO/EN | Online Booking | SEO

NE*** Files storage secure system

- Live secure client-document vault with TOTP multi-factor authentication, role-based access, row-level security, an in-app document viewer without downloads, soft delete with restore and a full activity log.

TOTP MFA | Supabase RLS | Role-Based Access

DevCraft devcraft.gr

- Bilingual EN/EL studio platform with embedded AI assistant on Google Gemini via Supabase Edge Functions, 30-day chat retention policy.
- Lead capture with RLS-protected tables, role-based admin portal, invisible reCAPTCHA v3, transactional email via Resend.
- Structured data and llms.txt for search and AI crawlers; code-split, performance-first architecture.

gretagreta.eu portfolio

- SSR React app with a streaming AI chat assistant that answers recruiter questions, plus an admin portal tracking visits and CV downloads.
- WCAG accessibility, GDPR consent layer, JSON-LD and llms.txt.

CleanUp SKG cleanupskg.gr

- Multilingual service and lead platform (EL/EN/RU) with dynamic pricing calculator, modal lead funnels, and automated email delivery via Resend.

Lotus Bloom lotusbloom.gr

- Bilingual beauty studio site with 100/100 desktop Lighthouse scores, WebP mobile image variants, and keyboard-accessible gallery.

PROFESSIONAL EXPERIENCE

QA Product Engineer • Zebracloud AB, Lithuania (remote) January 2024 – April 2026

- Worked with developers and product owners on a SaaS product, clarifying system logic and requirements before sprint planning.
- Ran end-to-end, functional and regression test suites on Windows, macOS and iOS/iPadOS using BrowserStack.
- Managed the defect lifecycle in Jira with detailed bug reports and test scenarios that helped developers resolve issues faster.
- Used Lovable to build landing pages, UI banners and client forms, cutting prototyping time from days to hours.

Manual QA Engineer • Sonaro UAB, Lithuania (remote) March 2021 – February 2023

- End-to-end and user acceptance testing for e-commerce platforms and ERP systems across mobile and desktop.
- Tracked defects in Jira and Confluence and proposed product improvements to the development team.
- Wrote user manuals, test cases and onboarding documentation in English and Lithuanian.

IT Project Manager • UAB Capital Realty, Lithuania November 2017 – November 2018

- Led Ruby and PHP development teams through sprints; managed CRM maintenance and tested the core web system.
- Main contact for international B2B clients in the UK, Spain and Latvia.

IT Project Manager • SJ Digital LLC, Lithuania May 2016 – November 2017

- Ran standups and sprint planning for .NET and PHP teams delivering new products.
- Primary contact for B2B clients in the USA and New Zealand; manual QA on every release before client handover.

SKILLS

Product & delivery: Requirements analysis, Agile/Scrum, Kanban, sprint planning, stakeholder management, Jira, Confluence, Trello
QA: Test strategy & case design, E2E, functional, regression, smoke, exploratory, UAT, mobile & cross-browser testing (BrowserStack)
Building with AI: Lovable, prompt engineering, React, TypeScript, Tailwind CSS, Supabase (Postgres, Auth, RLS, Edge Functions), Gemini API, GitHub, Vercel, DNS
Web quality: Accessibility (WCAG), Lighthouse performance, technical SEO, i18n, GDPR consent flows
